India's Polymer Boom: Capacity Expansion & Rising Demand Set to Reshape Market by 2030

India is poised for a significant expansion in polymer capacity, supported by robust export growth and steadily rising domestic demand. Polymer consumption is expected to increase through 2026-30, driven by key end-use sectors such as packaging, infrastructure, consumer durables (white goods), automotive, healthcare, toys, and others.

Despite this growth, India continues to depend on imports for nearly half of its polymer requirements, spurring more than \$5 million in planned investments throughout 2026-30. Over this period, total planned polymer capacity additions are estimated at around 20.2 million tonnes, covering major products including PP, LLDPE, LDPE, HDPE, and related grades.

Supportive policy measures such as Petroleum, Chemical and Petrochemical Investment Regions (PCPIRs), Plastic Parks, Extended Producer Responsibility (EPR) frameworks, and incentives for sustainable and green materials are accelerating circularity and enhancing the long-term viability of these investments. By 2030, India is expected to witness a meaningful rise in exports of polymers, fibres, and key intermediates, reinforcing its position in the global petrochemicals market.

See the map below displaying India polymers planned capacity 2026-30:

SHORT TERM OUTLOOK – OIL TANKER MARKET

A monthly report covering the next four months including trends in oil supply, demand and trade, tanker demand and supply, spot, and time charter rates for MRs up to VLCCs, comparisons with FFAs plus the latest news on developments impacting the oil and tanker sectors.

MEDIUM TERM OUTLOOK – OIL TANKER MARKET

Concise analyses of topical issues, consistent market data series and views on future trends in tanker charter rates. The report covers Oil Prices; Economic Developments; Oil Demand and Supply; Trade; Tanker Demand, Supply and Rates. Sent to clients around January, April, July and October each year

SHORT TERM OUTLOOK – VLGC MARKET

A monthly report looking four months ahead at likely trends in the VLGC Spot Market with the latest on key LPG carrier trades, benchmark LPG prices, arbitrage developments, a comparison with FFAs and recent news

MEDIUM TERM OUTLOOK – LPG CARRIER MARKET

A quarterly series of regular reviews, analyses and forecasts of the LPG Carrier Market. The report covers Economic Developments; LPG production, consumption and pricing; LPG, chemical gases and ammonia trade, LPG Carrier Demand, Supply and Rates for Fully Ref, Semi-Ref and Pressurised Ships. Reports are sent to clients around January, April, July and October each year.

CHEMICAL CARRIER WORLD SERVICE

An annual consultancy service currently providing Clients with an Annual Fundamentals Report, a Forecast Update, two quarterly Market Monitors, Monthly Commodity Trade Bulletins for key countries, an annual presentation on the market outlook and access to RLA's consultants and analysts to discuss issues arising from these reports.
